

Scienceworks

This term Year 1 students' inquiry topic is 'Stimulating Science'. During our visit to Scienceworks, we went to the 'What's with the Weather?' show where we learnt how clouds are formed and how they make lightning. We also went to the 'Toys and Forces' show where we learnt about different forces such as push, pull and twist. We all loved the general viewing area where we explored lots of different science concepts. A much loved favourite was racing against Cathy Freeman.
