

# Year 5 Weather Instruments

This term, the Year 5's are working on the inquiry unit 'Think Global, Act Local'. The unit focuses on sustainability, weather (including natural disasters) and the cost of living across Australia and around the world.

Over the last couple of weeks, the Year 5 students have been working interdependently to create a variety of weather instruments and to record their data in groups.

Below are some photos of the students constructing and measuring the weather using their anemometers, wind vanes, barometers and rain gauges.
